REPORT

This is undoubtedly a Colt revolver, possibly of one of the earlier patterns such as the 1851 ^{.36} ~~44~~ Calibre Colt ~~Dragoon~~ ^{Navy} Revolver.

In this state the Dragoon revolver is hard to tell apart from the Navy Revolver of the same date which also has a 7 1/2" barrel, but the Dragoon revolver has a larger (.44) calibre and this one appears much closer to .36. The Navy revolvers were made under licence in London for sale in this country
