(3) WEB BELT AND BUFF STRAPS FOR CARRYING GREAT-COAT, see paragraph 14.

The belt is made from $2\frac{1}{2}$ -inch worsted web, and is strengthened at the eyelet holes by a light piece of leather. The coat straps are made from buff leather, and the furniture of gilding metal. For Rifle Regiments the web and leather are black.

(4) SWORD-KNOT (UNIVERSAL PATTERN), UNDRRESS

A. O. 151
1899

The sword-knot to be used with the "Sam Browne" belt is the universal pattern of brown leather. It is a plain strap made of pigskin, best bridle leather, or calf, the ends being secured into an "acorn" having plaited leather covering. It is furnished with a sliding keeper.

Length of strap in the double, 15 inches; width of strap, $\frac{5}{8}$ inch; length of acorn, $2\frac{1}{2}$ inches.

APPENDIX IX.

DESCRIPTION OF THE PATTERN WITH WHICH OFFICERS ARE RECOMMENDED TO PROVIDE THEMSELVES.

The bottle is made of pure aluminium, of the form and dimensions shown in the accompanying drawings:—

Bottle complete, with cover and sling.

APPENDIX VIII

BELTS AND SWORD KNOT (UNIVERSAL PATTERN).

(1) THE "SAM BROWNE" BELTS.

Pattern No. 397.

Sealed 4th January, 1900.

(Plate 70.)

(Worn by officers of all branches of the service. See paragraph 28).

A.O.
151
1899

The belts, complete, consist of a waist-belt, two shoulder-belts, a sword-frog, an ammunition-pouch, and a pistol-case; the whole made of brown bridle leather.

The waist-belt is $2\frac{3}{4}$ inches wide, and of a length to suit the wearer. It is fitted with a double-tongued brass buckle, and has four brass dees for the shoulder-belts (two at the back, and one on each side), a running loop for the free end of the belt, two brass rings for attachment of the frog, and a hook for hooking it up. The waist-belt is lined with faced basil.

The shoulder-belts are plain straps (crossed at the back through a loop). They are $1\frac{1}{2}$ inches wide. The patterns are about 35 inches long over all, without chapes. The length however may be varied to suit the wearer. They are fitted with studs for attachment to the dees at the back of the waist-belt. A chape, with stud and a buckle, is provided for each, for attachment to the dees at the sides of the belt.

In mounted services the strap over the left shoulder need not be worn, except when it is required to support the revolver.

The frog is fitted with two straps, which are to be passed through the rings on the lower part of the belt. Each strap is secured by a stud. The frog has a small brass dee on the top, to go over the hook on the belt when "hooking up." A small strap passes through the front and back for securing the sword scabbard. A stud is fitted on the front of the frog, upon which the tab of the scabbard supporter may be fastened. (See description of leather scabbard.)

A small strap for steadying the sword hilt is attached to the rear ring for the frog, holes being made in the strap to pass over a stud on the belt above the front ring.

The ammunition-pouch and pistol-case are fitted with loops on the back for attachment to the waist-belt; also with stud and tab fastenings. The loop on the pistol-case is furnished with a small brass hook, which should pass through a hole to be made for the purpose in the belt to suit the wearer in order to secure the case and keep it in position.

The pattern pistol-case is to be regarded as typical only, as its dimensions must suit the particular pattern of pistol carried.

The "furniture" should be of the best yellow brass.

(2) WEB SWORD BELT.

(See paragraph 28.)

This consists of a waist belt and a shoulder suspender of worsted web, strengthened at various parts with black Morocco leather. It is furnished with loops, chapes, and dees, as shown in the drawing annexed. The loops and chapes are of Morocco leather, and the furniture of gilding metal.

The suspender is fitted with hooks so that it can be removed by officers wearing the web belt under the sash, outside the frock coat.
